

# Infrared Heater Incentive Program

## Receive \$100

for each infrared  
heater you install

### How to participate:

Claim the \$100 incentive per infrared heater in just 2 easy steps!

- 1 Purchase and install an approved natural gas infrared heater
- 2 Provide your complete contact information along with installation site details to either your infrared heater distributor or to your local Union Gas Account Manager

**RECEIVE  
\$100**

for each infrared heater you install

## Help your customers conserve energy and save money

Nothing is hotter in energy efficiency than infrared heaters. Infrared heaters save energy and money by delivering heat directly to where it's needed – to people and objects, instead of inefficiently heating the air within a space like traditional forced air heating systems do.

## Infrared Heater benefits

- Quick heat recovery
- More efficient than forced air because it heats objects directly
- Space-efficient, often suspended from ceilings
- Annual energy savings from reduced heating and electrical costs
